A WORD FROM JRA

We welcome you as the owner of a new Rover Car. Being the purchaser of such a fine vehicle, we are well aware of the importance of providing you with total customer care and protection so your investment is maintained.

Your new car is protected by the Rover Warranty for two years irrespective of distance. There are additional benefits and these are detailed in your Consumer Guide booklet provided in the vehicle wallet.

This Service Record Book provides recommendations on the maintenance necessary to ensure your car gives many years of trouble-free driving. It also provides facilities to record the date and odometer reading when each service is carried out. Your Dealer will complete these at the appropriate time.

Rover Dealers are trained and equipped to service your vehicle efficiently and economically in accordance with Rover guidelines and with exclusive use of genuine replacement parts. By following the advice given in this book and with the support of your Rover Dealer, your car will remain safe and reliable and, at the same time, retain its maximum value.

We wish you many years of happy motoring.

JRA Limited

MAINTENANCE AND SERVICE

Regular maintenance by a Rover Dealer, together with the exclusive use of genuine Rover parts, is the key to economy, safety and reliability from your vehicle. We strongly recommend that you use the facilities offered by your Rover Dealer.

The handbook provided with your vehicle details the maintenance operations required, some of which are simple checks which you can perform.

These include weekly attention to the following:

- Engine and automatic transmission oil levels;
- Tyre pressures, including spare tyre;
- Coolant levels;
- Fluid levels, including power-assisted brake and steering reservoirs;
- Windscreen-washer reservoir.

For the more complex maintenance needs, Rover, through its Dealers, offers its unique sequenced service system with the built-in benefits of guaranteed workmanship at minimum costs.

When ordering a service, you give authority to the Dealer to carry out the operations recommended by Rover applicable to your vehicle, including the replacement of consumable items. Dealers may recommend the need for replacements or additional service operations as a result of their inspections. These will only be carried out with your prior agreement. The Dealer will provide a copy of the service job sheet which shows all service operations in detail.

SPECIAL MAINTENANCE – Hydraulic Brake Systems

In addition to the recommended inspection of all brake components, it is advisable as the vehicle ages to make a more searching inspection and renew parts as necessary as a precaution against the effects of wear and deterioration.

1. Brake fluid should be changed completely every 40,000 km using the recommended brake fluid.
2. All fluid seals in the brake hydraulic system should be renewed and all flexible hoses should be examined and renewed if necessary every three years or 60,000 km, whichever is the sooner. At the same time the working surfaces of the pistons and the bores of the master cylinder and other slave cylinders should be examined and new parts fitted where necessary.

The work detailed for the brake system requires a great deal of skill and should be entrusted to a Rover Dealer.

TYRES

It is important for your safety that you always use the correct type of tyre and maintain your tyre pressures in accordance with the recommendations given in the Owner's Handbook. Check your tyres at frequent intervals for general condition, pressure and uneven wear, especially if fast motoring is anticipated.

GENUINE PARTS

Genuine Rover parts and accessories are developed and designed specifically for use on Rover cars. Their exclusive use will prove beneficial for the safety and reliability of your car and you will benefit from full Warranty coverage.

CHANGE OF ADDRESS OR OWNERSHIP

In the event of you changing your address or your car being sold, please complete a Change of Ownership/Address Notification Form provided at the rear of this book.
